Office of the Revisor of Statutes Administrative Rules

TITLE: Proposed Permanent Rules Relating to Air Toxics Reporting

AGENCY: Minnesota Pollution Control Agency

REVISOR ID: R-4599

MINNESOTA RULES: Chapters 7002, 7005, 7007, and 7019

INCORPORATIONS BY REFERENCE:

Part 7019.3110, subpart 3: *Report on Carcinogens*, National Toxicology Program, United States Department of Health and Human Services (15th edition and subsequent editions). The report is not subject to frequent change and is available on the website of the National Institute of Environmental Health Sciences (https://www.niehs.nih.gov).

Part 7019.3110, subpart 3: *IARC Monographs on the Identification of Carcinogenic Hazards to Humans*, International Agency for Research on Cancer (volumes 1 to 134 and as subsequently added). The monographs are subject to frequent change and are available on the website of the International Agency for Research on Cancer (https://monographs.iarc.who.int/monographs-available).

The attached rules are approved for publication in the State Register

Cindy K. Maxwell

Gindy K. Maxwell

Assistant Deputy Revisor

1.1	Minnesota Pollution Control Agency
1.2	Proposed Permanent Rules Relating to Air Toxics Reporting
1.3	7002.0015 DEFINITIONS.
1.4	[For text of subparts 1 and 2, see Minnesota Rules]
1.5	Subp. 2a. Chargeable pollutant. "Chargeable pollutant" means a pollutant that is
1.6	assessed a fee and includes the following:
1.7	[For text of items A and B, see Minnesota Rules]
1.8	[For text of subparts 2b to 4, see Minnesota Rules]
1.9	7005.0100 DEFINITIONS.
1.10	[For text of subparts 1 to 2b, see Minnesota Rules]
1.11	Subp. 2c. Air toxics. "Air toxics" means pollutants, except for criteria pollutants, that
1.12	are known or suspected to cause cancer or other serious health effects or adverse
1.13	environmental and ecological effects. Air toxics includes the pollutants listed under part
1.14	7019.3110, subpart 2.
1.15	Subp. 2d. Air toxics reporting facility. "Air toxics reporting facility" means a facility
1.16	in Anoka, Carver, Dakota, Hennepin, Ramsey, Scott, or Washington County for which the
1.17	owner or operator of the facility must obtain an air emission permit under chapter 7007, but
1.18	does not include a facility permitted under part 7007.1120, registration permit option B.
1.19	[For text of subparts 3 to 44a, see Minnesota Rules]
1.20	Subp. 44b. Toxic release inventory list. "Toxic release inventory list" or "TRI list"
1.21	means the list of chemicals and chemical categories adopted by the Environmental Protection
1.22	Agency under Code of Federal Regulations, title 40, section 372.65, according to the federal
1.23	Emergency Planning and Community Right-to-Know Act, United States Code, title 42,
1.24	section 11023.

Cylenaut 1	Emission	inventory	bowinson
Subpart 1.	EIIII321011	mventorv	requireu.

A. All owners or operators of emission reporting facilities, as defined in part 7002.0015, subpart 3a, shall and air toxics reporting facilities, as defined in part 7005.0100, subpart 2d, must submit an annual emission inventory report to the agency, commissioner.

B. The report under item A must meet the following criteria:

- (1) the owner or operator of an emission reporting facility must submit the report in a format specified by the commissioner, relating to ammonia, carbon monoxide, particulate matter, and all chargeable pollutants as defined in part 7002.0015, subpart 2a-;
- (2) the owner or operator of an air toxics reporting facility must submit the report in a format specified by the commissioner, relating to air toxics according to part 7019.3110;
- (3) The report shall be submitted the owner or operator of an emission reporting facility or air toxics reporting facility must submit the report on or before April 1 of the year following the calendar year being reported-; and
- (4) the responsible official, as defined in part 7007.0100, subpart 21, must sign the report and shall make the following certification:

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision by qualified personnel. The information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I understand that the data provided in this document will be used by the MPCA to calculate a fee, which that the facility will be required to pay under Minnesota Rules, part 7002.0065, based on the tons of pollution emitted by the facility."

B. C. (1) All owners or operators of facilities issued option B registration permits under part 7007.1120 shall must submit either an emission inventory using methods described

7019.3000 3

under subitem (3) and parts 7019.3020 to 7019.3100 or the certification and VOC-containing material report in subitem (2). The report shall must be submitted on or before the April 1 following the calendar year being reported.

(2) All owners or operators that choose to be assessed a fee under part 7002.0025, subpart 1, item C, subitem (2), shall must submit a report and certification to the agency commissioner. The responsible official, as defined in part 7007.0100, subpart 2, must sign the report and shall make the following certification:

"I certify under penalty of law that the facility described in registration permit number is eligible for the option B registration permit that it was issued and holds and that the facility purchased or used (as stated in the permit application) gallons of VOC-containing materials in the 12-month reporting period. I further certify that the eligibility of the facility and the quantity of material reported herein were determined under my direction or supervision by qualified personnel. The information used to determine eligibility and the quantity of material reported herein for the registration permit is, to the best of my knowledge and belief, true and accurate. I understand that the information provided in this certification will be used by the MPCA to assess a fee under Minnesota Rules, part 7002.0025, subpart 1, item C, which that the facility will be required to pay under Minnesota Rules, part 7002.0065."

- (3) All owners and operators that choose to be assessed a fee under part 7002.0025, subpart 1, item C, subitem (1), shall must submit an emission inventory report to the agency commissioner, in a format specified by the commissioner, relating to emissions from the use of VOC-containing materials using methods described in part 7019.3030, item B subpart 2, and the certification in subitem (2). The certification and emission inventory shall must be signed by the responsible official, as defined in part 7007.0100, subpart 2.
- Subp. 2. **Owner or operator error in reporting data.** If an owner or operator discovers an error in the data after having submitted it to the agency commissioner, the

7019.3000 4

owner or operator shall <u>must</u> submit corrected data, with a written explanation of the mistake and why it occurred. If the commissioner agrees that the correction is appropriate, the commissioner shall <u>must</u> correct the data in the inventory. However, for purposes of assessing the emission fee under part 7002.0025, the commissioner shall <u>must</u> not accept any correction submitted by an owner or operator which that would result in a reduction of tons emitted if the correction is submitted more than 45 days after the mailing date of the previous <u>calendar</u> year's air emissions summary.

Subp. 3. Mercury emission sources.

5.20

5.21

5.22

5.23

A. Owners or operators of a mercury emission source as defined in part 7005.0100, subpart 23b, must submit an annual emission inventory report of the mercury emissions to the commissioner in a format specified by the commissioner. The report must be submitted on or before April 1 of the year following the <u>calendar</u> year being reported. The initial report must cover the first full calendar year following September 29, 2014.

- <u>B.</u> Owners or operators of stationary sources that have air emissions of mercury but that are not mercury emission sources must report every three years.
- <u>C.</u> Owners or operators of stationary sources that are air toxics reporting facilities must report mercury emissions as provided under part 7019.3110.
- Subp. 4. **Possible mercury emission sources.** If the commissioner determines that a stationary source has activity levels or emission factors that indicate that the source may be a mercury emission source, the commissioner may request that the owners or operators quantify the source's mercury emissions using the methods listed in part 7019.3030, item A subpart 1. The owners or operators must complete the quantification and submit a report to the commissioner within 120 days of the commissioner's request.

<u>Subpart 1.</u> <u>Scope.</u> A. Emissions from all emissions units must be reported in the annual emissions inventory report in a format specified by the commissioner.

Subp. 2. Insignificant activities. Emissions from insignificant activities listed in part 7007.1300, subpart 2, must not be reported. Emissions Emission reporting facilities and air toxics reporting facilities are not required to report emissions from insignificant activities listed in part 7007.1300, subparts 3 and 4, and conditionally insignificant activities listed in part 7008.4000 must be reported if unless:

A. the commissioner or owner or operator has determined that emissions from those activities are not insignificant for purposes of permitting under parts 7007.0100 to 7007.1850 7007.1800 or for those activities required to be quantified by a facility issued a capped permit option 1. Notwithstanding the previous sentence; or

<u>B.</u> the commissioner <u>may request requests</u> an inventory of fugitive emissions from roads and parking lots, defined as insignificant under part 7007.1300, subpart 3, item G, upon determining that emissions from these sources represent a substantial portion of the facility's total emissions.

- Subp. 3. Calculating emissions. B. Except as provided in subparts 4 to 7, all owners or operators of emission reporting facilities, as defined in part 7002.0015, subpart 3a, or facilities issued option B registration permits under part 7007.1120 that choose to be assessed a fee under part 7002.0025, subpart 1, item C, subitem (1), shall must calculate emissions based on parts 7019.3030 to 7019.3100, except for any facility which that has obtained an option A, C, or D registration permit under part 7007.1115, 7007.1125, or 7007.1130 or a capped permit under parts 7007.1140 to 7007.1148.
- Subp. 4. Calculating emissions for option A permits. C. Owners or operators of emission reporting facilities that hold an air emission permit under part 7007.1115, registration permit option A, must report actual emissions calculated for the calendar year

7019.3020 6

for which emissions are being reported in a format specified by the commissioner. The owners or operators of a facility issued an option A registration permit under part 7007.1115 must calculate emissions for all emission units using the methods listed in parts 7019.3030 to 7019.3100.

Subp. 5. Calculating emissions for option C permits. Definition All owners or operators of emission reporting facilities which that have obtained an air emission permit under part 7007.1125, registration permit option C, shall must report the quantity of each fuel purchased or used (whichever was stated in the facility's registration permit application) in the calendar year for which emissions are being calculated. The report shall must apportion the quantity of fuel burned with the type of combustion unit (indirect heating units or internal combustion engines) in which that it was burned in. The owner or operator shall must report the quantity of VOC-containing materials purchased or used (whichever is stated in the facility's registration permit application) in the calendar year for which emissions are being calculated and air toxics emissions using the method listed in part 7019.3060. The owners or operators reporting VOC-containing materials purchases or usage shall must also report the weight factor (WF) of the VOC and air toxics in the materials (weight of VOC per weight of VOC-containing materials) and the density of the materials. The actual emissions shall be calculated by the commissioner.

Subp. 6. Calculating emissions for option D permits. E. All owners or operators of emission reporting facilities which that have obtained an air emission permit under part 7007.1130, registration permit option D, shall must report the actual emissions calculated for purposes of compliance demonstration required in part 7007.1130, subpart 3, item E, for the calendar year for which emissions are being reported in a format specified by the commissioner.

Subp. 7. Calculating emissions for capped permits. F. All owners or operators of emission reporting facilities which that have obtained an air emission permit under parts

7019.3020 7

7007.1140 to 7007.1148, capped permit, shall <u>must</u> report the actual emissions calculated for purposes of compliance demonstration required in part 7007.1146, subpart 2, item H, for the calendar year for which emissions are being reported for all emission units in a format specified by the commissioner.

8.24

8.25

Subp. 8. Material balance. G. All owners or operators of an emission reporting facility submitting an emission inventory based in whole, or in part, on a material balance calculation shall must submit a sample material balance calculation with the emission inventory. Such facilities shall must also maintain a record of the material safety data sheets or vendor certification of the VOC, air toxics, mercury, or sulfur content of the material for each material or fuel used and the material balance calculations for a period of five years after the date of submittal of the emission inventory is submitted.

Subp. 9. Control equipment. H. The An emission inventory may be based on the use of control equipment only if the use of the specific control equipment is required under conditions of a permit or applicable requirement as defined in part 7007.0100, subpart 7, or is included in a notification received by the agency commissioner under part 7007.1150, item C. This item subpart applies upon issuance under chapter 7007 of a registration, state, capped, general, or part 70 permit to a stationary source but no earlier than the date three years after EPA grants full program approval of the agency's permit program under Title 5 of the Clean Air Act.

Subp. 10. Control efficiency factors. An owner or operator submitting the emission inventory must apply control efficiency factors, as defined under part 7005.0100, subpart 9b, to air toxics emissions calculations according to items A and B, unless the control efficiency factor for the pollutant is identified in the permit. The owner or operator must:

A. use the VOC control efficiency factor for volatile air toxics; and

B. use the PM10 control efficiency factor for particulate air toxics.

Subpart 1. Method hierarchy. A. The owner or operator of an emission reporting
facility, except one issued an option C or D registration permit under part 7007.1125 or
7007.1130 or a capped permit under parts 7007.1140 to 7007.1148, shall must calculate the
facility's actual emissions using the methods listed in subitems (1) to (4) items A to D. The
owner or operator of an air toxics reporting facility issued an option D registration permit
or a capped permit must calculate air toxics emissions for each emission unit using the
methods listed in items A to D, except that similar emission units may be aggregated. The
methods are listed in a hierarchy of the most preferred method to the least preferred method.
The most preferred method available shall <u>must</u> be used. Where more than one method is
listed in the subitem item, they are considered to be equal in the hierarchy and any can be
used:

- A. (1) part 7019.3040 (continuous emission monitor data);
- 9.14 B. (2) part 7019.3050, item B (performance test data);
- 9.15 <u>C.</u> (3) part 7019.3060 (VOC <u>and air toxics</u> material balance), 7019.3065 (mercury material balance), 7019.3070 (SO₂ <u>SO</u>₂ material balance), 7019.3080 (emission factor), or 7019.3090 (enforceable limitations), as applicable; or
- 9.18 <u>D.</u> (4) part 7019.3100 (facility proposal).
 - Subp. 2. Option B permit fees. B. The owner or operator of a facility issued an option B registration permit under part 7007.1120 that chooses to be assessed a fee under part 7002.0025, subpart 1, item C, subitem (1), shall:
- 9.22 <u>A. must calculate the facility's actual emissions using the methods listed in part</u>
 9.23 7019.3060-; and

7019.3030 9

10/02/24	REVISOR	CKM/KR	RD4599

The owner or operator of a facility issued an option B registration permit under part 7007.1120 that chooses to be assessed a fee under part 7002.0025, subpart 1, item C, subitem (1), shall

10.23

10.24

10.25

10.26

<u>B.</u> <u>must not consider the effects of pollution control equipment on emissions from the use of VOC-containing materials when calculating actual emissions for an emissions inventory.</u>

Subp. 3. Selecting calculation method. C. For purposes of selecting a calculation method, a method is considered available if the conditions associated with the method in parts 7019.3040 to 7019.3100 are met. The method described in part 7019.3100 may be used, provided that if the proposal is submitted to the commissioner by September 1 of the first calendar year for which the emissions are being calculated. The commissioner must reject data submitted using the methods described in parts 7019.3040 to 7019.3090 if the conditions for the method are not fully met.

Subp. 4. **Reporting individual pollutants.** An owner or operator of a facility must report individual pollutants to the maximum extent feasible. If the owner or operator cannot report individual pollutants within a group, such as lead compounds or nickel compounds, the owner or operator must report total emissions as a group.

7019.3060 VOLATILE ORGANIC COMPOUND (VOC) <u>AND AIR TOXICS</u> MATERIAL BALANCE.

If the methods in part 7019.3040 or 7019.3050 are unavailable to the owner or operator of an emission reporting facility or a facility issued an option B registration permit under part 7007.1120 that chooses to be assessed a fee under part 7002.0025, subpart 1, item C, subitem (1), the facility may calculate VOC and air toxics emissions using the material balance method described in this part. This method may be used in conjunction with or instead of emission factors and enforceable limitations methods described in parts 7019.3080 and 7019.3090, where applicable. A person using material balance to calculate VOC and

7019.3060 10

<u>air toxics</u> emissions must determine the total VOC <u>emissions and air toxics</u> emissions (E) as follows:

11.3
$$E = (A - B - C) * (1 - CE)$$

11.4 where:

11.21

11.22

11.23

11.24

A = the amount of VOC and air toxics entering the process. The amount of VOC used in this calculation must be the amount certified by the supplier, the maximum amount stated on the material safety data sheet, or the amount determined by reference method 24.

B = the amount of VOC <u>and air toxics</u> incorporated into the product. This includes VOCs chemically transformed in production. An explanation of this calculation must also be submitted.

C = the amount of VOC <u>and air toxics</u>, if any, leaving the process as waste, or otherwise not incorporated into the product and not emitted to the air. If the actual VOC <u>and air toxics</u> content of the waste is unknown, then C = 0.

CE = the control efficiency, or the product of capture efficiency and collection or destruction efficiency, of any device used to capture and/or control VOC and air toxics emissions, expressed as a decimal fraction of 1.00. The control efficiency must be based on efficiency factors, as defined in part 7005.0100, subpart 9b, including air toxics, or must be based on the control efficiency verified by a performance test conducted according to parts 7017.2001 to 7017.2060 and 7019.3050. The overall efficiency of a pollution control system that uses a hood, as defined in part 7011.0060, subpart 2, as the emission capture device must be based on a capture efficiency of 60 percent. If an alternative capture efficiency has been determined by a performance test conducted according to parts 7017.2001 to 7017.2060 and 7019.3050, that capture efficiency must be used in the calculation of actual emissions.

12.5	performance test conducted according to parts 7017.2001 to 7017.2060 and 7019.3050.
12.6	Calculations of actual emissions from an emission unit through a pollution control system
12.7	that uses a hood, as defined in part 7011.0060, subpart 2, as the emission capture device
12.8	must be based on a capture efficiency of 80 percent. If an alternative capture efficiency has
12.9	been determined by a performance test conducted according to parts 7017.2001 to 7017.2060
12.10	and 7019.3050, the owner or operator must use that capture efficiency in the calculation of
12.11	actual emissions.
12.12	7019.3110 AIR TOXICS EMISSION INVENTORY AND EMISSIONS REPORTING.
12.13	Subpart 1. Inventory required. An owner or operator of an air toxics reporting facility,
12.14	as defined in part 7005.0100, subpart 2d, must include the air toxics emissions under subpart
12.15	2 in the annual air toxics emission inventory according to part 7019.3000.
12.16	Subp. 2. Air toxics to be reported.
12.17	A. An owner or operator of an air toxics reporting facility must include HAPs as
12.18	defined in part 7007.0100, subpart 12a.
12.19	B. An owner or operator of an air toxics reporting facility must include PFAS as
12.20	defined in Minnesota Statutes, section 116.943, subdivision 1, paragraph (p), that are listed
12.21	on the TRI list defined in part 7005.0100. An owner or operator must also include the
12.22	following PFAS:
12.23	Chemical Abstracts Service (CAS) number Pollutant
12.24	(1) 375-61-1 1,1,2,2,3,3,4,4,5,5-Undecafluoropentane
12.25	(2) 811-97-2 1,1,1,2-Tetrafluoroethane
