

Scan before you swim!

A blue-green algae bloom may be present. Blue-green algae can produce toxins that can make people and animals sick.

Avoid water that looks like this:

is discolored or streaky

looks like spilled paint or pea soup

has floating scum, globs, or mats

has small green dots floating in it

- Don't swallow lake water or touch foam, scum, or algal mats.
- Don't let pets swim in scummy water or lick algae off their fur.
- Rinse fish with fresh, clean water and throw away guts before cooking and eating.
- Don't swim in areas where you cannot see your feet in knee-deep water.

For more information on harmful algal blooms, please call 651-757-2822 or toll-free from Greater Minnesota at 1-800-657-3864
